

# HDMI Cables

## **HDMI (High Definition Interface)**

HDMI (High Definition Multimedia Interface) is the first industry-supported, uncompressed, all-digital audio/ video interface. HDMI provides an interface between any audio/ video source, such as a set-top box, DVD player, and A/V receiver and an audio and/ or video monitor, such as a digital television (DTV).

HDMI is fully backward-compatible with DVI using the CEA - 861 profile for DTVs. HDMI DTVs will display video received from existing DVI - equipped products, and DVI - equipped TVs will display video from HDMI sources. HDMI technology uses a much more compact and user - friendly connector than the existing DVI connector. The HDMI specification handles a higher - bandwidth, uncompressed video and multi - channel digital audio, all in one neat cable solution.
